## OUR ADVICE

## MAINTENANCE ADVICE

We recommend treating your Cinzento Custom Made® floor with our Cinzento Custom Made® caring products. Our Cinzento Custom Made® products are easy to apply and ensure proper maintenance of your floor.

Place felt mats under chairs and tables. Never place plants directly onto a wooden floor. Always use a pot stand or dish.

Please contact your Cinzento Custom Made® parquet specialist for stubborn stains and/or lime spots which you can't seem to remove or if you have any queries about your Cinzento Custom Made® floor.

Looking for a Cinzento Custom Made® Dealer in your area? Please leave your contact details at: [www.cinzento.nl](http://www.cinzento.nl), we will then put you in touch with the nearest Cinzento Custom Made® Dealer.

# CLEANING

We recommend to clean your Cinzento Custom Made® floor maximum 1x every fortnight with water and **Cinzento Custom Made® Soap**. Only dry-clean (vacuum, Swiffer etc.) the floor on other days. Daily cleaning with water and soap is not advisable.

Use maximum 50 ml **Cinzento Custom Made® Soap** per 10 litres of water (note: this is a full bucket!) to clean your floor. If too much soap is used, a soft film will form on the floor which will absorb ever more dirt. So do not use more than the prescribed dose/frequency.

- A newly oiled floor should only be dry-cleaned during the first week.
- Preferably use two buckets of water for mopping the floor, i.e. one bucket containing tepid water and **Cinzento Custom Made® Soap** and one bucket containing cold water (in which any dirt will be collected).
- Use as little water as possible and certainly do not let water remain on the floor.
- Make sure adequate ventilation is available during drying.
- It is not recommended to use aggressive cleaning products. Please also avoid using other chemicals, such as chlorine, turpentine etc., as these substances may damage the oil coat of the floor.

# MAINTENANCE

You may use **Cinzento Custom Made® Refresh ECO** to refresh your floor. **Cinzento Custom Made® Refresh ECO** is colourless and applicable to all coloured floors. It is also possible to use this locally.

1. Use only a slightly damp cloth to clear away all dirt and dust from the floor. Let the floor dry. Spray **Cinzento Custom Made® Refresh ECO** on the surface and rub it in with a lint-free cloth (microfiber cloth).
2. Use very little **Cinzento Custom Made® Refresh ECO** to avoid the floor from becoming sticky. About 40-50 m<sup>2</sup> can be covered with 0.5 litres. Leave the product to soak in for several minutes. Rub the treated area with a lint-free cloth.
3. We recommend not to treat too large areas, so that treated areas can be rubbed dry and polished within a few minutes. No circles or streaks should be visible.
4. Foot traffic possible after +/- 1 hour in well-ventilated areas.
5. 100ml base oil and a hand pad is included for damaged areas where the colour needs to be restored.
6. Cinzento Custom Made® caring products naturally have a matte appearance. If desired, we can also deliver shiny products.
